```
95/302 cadherin binding
                                                                                     p < 0.001
126/429 cell adhesion molecule binding
                                                                                     p < 0.005
16/51 GDP binding
                                                                                     p < 0.01
201/714 regulatory region nucleic acid binding
159/570 transcription regulatory region sequence-specific DNA binding
89/306 core promoter proximal region DNA binding
222/873 sequence-specific DNA binding
273/1038 sequence-specific DNA binding transcription factor
99/264 small conjugating protein ligase binding
43/171 transferase, transferring hexosyl groups
